

VINTAGE 2022 :

We must admit that this is a harvest "quite blessed by the gods"!

"After a demanding and testing 2021 vintage, the 2022 vintage gave us grounds for some worries and concerns but will eventually live up to our expectations. »

The weather conditions in the vineyard

Significant rainfall in June avoid the vines suffering too much from the water stress that marked the year all over France. Following a dry period, lighter rains in August and at the beginning of the harvest came to supplement the water supply. This was beneficial to the maturity of the grapes and allowed us to get a substantially good quantity of grapes despite some occasional hail storms

The harvest

The harvest started quite early this year and was carried out during changing weather conditions with alternating rainy and sunny phases. However, the ambient coolness in the air made it possible to preserve the organoleptic qualities of the grapes, which will help develop pleasant aromas in the long run.

The first impressions of the vintage

Good balances.

The qualities of the wines of this 2022 vintage will be present.

The alcoholic fermentations developed without a hitch.

The acidities are less important than in the 2021 vintage, which makes it possible to obtain wines with more roundness and to maintain a good level of freshness after all.

The alcoholic degrees are stable within a range of 12.5 to 13% vol, which will give wines of superior qualities with a greater aging potential.

The white wines offer noses with floral and white-fleshed fruit notes, supplemented by a large variety of citrus fruits notes, mixed with sensations of roundness and freshness. The mouths are full and crunchy. They combine matter and elegance.

Depending on the terroir and the date of harvest, their balance in the mouth is characterized by a sweet freshness with more or less vivid acidities but with beautiful tensions.

The rosé wines : Unlike the last 2 years, the production of Pinot noir being plentyfull in 2022, we will be able to produce our Sancerre rosé "Les Pierris" again !

You will discover an easy-to-drink wine combining freshness and fruit. To drink while still young.

The red wines : The nose is complex mixing notes of fresh red fruits, cooked fruits and spices. The vatting and extractions, well adjusted to the characteristics of the vintage, offer structured mouths resting on coated tannins. No doubt 2022 will give us great, powerful, balanced red wines with great aging potentials.

2022 is in line with the great vintages !
